

Paper & Laminate Information

Product 61 - **S-RACE Vivid 120gsm**

Transfer on all kinds of polyester materials (soft and hard substrates). Especially designed for sportswear, banners, flags, skis and snowboards. For medium to high ink coverage. Extremely fast drying

Transfer on all kinds of polyester materials (soft and hard substrates). Especially designed for sportswear, banners, flags, skis and snowboards. For medium to high ink coverage. Extremely fast drying, excellent line sharpness, superb and quick transfer properties, outstanding lay-flat performance, exceptional quality consistency, suitable for soft and hard substrates. Made in Germany.

Product 79 - **Matte Wrapping Paper 100gsm**

Looking for the perfect paper for photo quality printing and gift wrapping? Look no further than our super-smooth matte coated 100gsm paper 24 inches (60.96 cm) wide, 3 roll pack. Not only does it provide instant drying for quick and easy printing, but it also features a barrier back coating to reduce cockling. With excellent opacity, it's ideal for obscuring the surprise inside the wrapped gift. Plus, its easy-to-fold design gives it the feel of traditional wrapping paper. Water-resistant with photo black ink, however matte black ink is recommended to achieve deeper blacks.

Product 111 - **Heavy Matte Paper 180gsm**

The heavyweight 180gsm premium matte coated paper is designed to deliver high-resolution prints in photo quality. With its 24 inches (60.96 cm) x 45 meter roll length, it meets size requirements for most professional printing needs. The premium coating is perfect for graphics with high ink weights, ensuring vibrant and crisp images. Its fast drying feature with Dye & Pigment inks makes it a convenient and efficient option for producing professional prints.

Product 219 - **Satin Photo Paper 190gsm**

Designed to achieve the maximum colour gamut from printers that use pigment inks. This microporous satin coated, bright white 190gsm, 42 inches (1067 mm) wide x 60m long photo paper roll will produce stunning graphics in life-like colours. The paper benefits from instant drying, water resistance and smudge resistance properties. In addition, the paper is manufactured to prevent cockling and wrinkling during the printing process. Please note: this roll has a 2 inch core.

Product 224 - **Gloss Photo Paper 190gsm**

This photo paper is perfect for creating stunning high quality life-like, vibrant graphics with photo-quality results. The microporous coating ensures maximum colour gamut from printers using pigment ink, while the instant drying, water resistance, smudge resistance, and cockle-free features make it a reliable choice and go-to product for printing professionals. Available in 190gsm, 42 inches (1067 mm) wide x 60m long roll, with a 2-inch core.

Product 226 - **Semi Matte Paper 200gsm**

This technically advanced semi matte paper has a low sheen, is highly absorbent with a fast drying coating. It measures 200gsm (240mic), 42 inches (1067 mm) wide x 30m long roll. Best used for low cost photographic quality posters as it has a colour gamut comparable to microporous coated papers. Other benefits include, smudge resistant and cockle/wrinkle free printing when used with the appropriate printer settings. Another great advantage of this paper is that it contains no polyethylene layers, allowing it to be completely recycled. Please note, this product has a 3-inch core.

Product 19 - Satin Laminate 100mic

This pressure sensitive, satin lamination film is designed to protect inkjet prints against abrasion, pollution and moisture, thereby extending the life of a print by up to 4 times. The smooth satin finish greatly reduces reflections without compromising colour intensity and water based adhesive makes it ideal for laminating internal graphics. A silicone release paper provides for easy handling and the extended roll length ensures greater productivity. 3" Core

Product 12 - Flat Matte Laminate 100mic

This pressure sensitive, flat matte lamination film is designed to protect inkjet prints against abrasion, pollution and moisture, thereby extending the life of a print by up to 4 times. The flat matte finish enhances any image giving a smooth contemporary photographic matte finish and the solvent acrylic adhesive makes it ideal for both indoor and outdoor use. A silicone release paper provides for easy handling and the extended roll length ensures greater productivity. 3" Core

Product 27 - Super Gloss Laminate 80mic

This pressure sensitive, high gloss lamination film is designed to protect inkjet prints against abrasion, pollution and moisture, thereby extending the life of a print by up to 4 times. The high gloss finish gives a more glossy finish than our LM840 with a greater enhancement of colours to give a bright photographic result. The solvent acrylic adhesive makes it ideal for both indoor and outdoor use. A silicone release paper provides for easy handling and the extended roll length ensures greater productivity. 3" Core

Product 36 - Ultimate Photo Gloss Laminate 200mic

A mirror like gloss lamination film made from 100% Polyester giving the ultimate gloss finish to high quality photographic prints or graphics requiring a mirror like finish. The solvent acrylic, pressure sensitive adhesive ensures a strong permanent bond. A clear polyester release liner provides easy handling. 3" Core

Product 375 - Essential Cotton Canvas 330gsm

Our budget Essential Cotton Canvas is great for those looking for a more authentic looking canvas than polyester, but at a much lower price. This quality 330gsm budget matte, bright white cotton rich canvas 44 inch (1118 mm) wide x 30 metre long roll has a look and feel similar to more expensive products. Furthermore, it is compatible with printers that use dye and pigment ink systems, and will work on all Epson, HP and Canon large format printers. Benefiting from a wide colour gamut, it offers good water resistance with pigment inks, which is helpful if you want to protect it with a water-based varnish. A great product for photo reproductions as it's completely seedless and has a good canvas texture with excellent crack resistance. Although, please remember, Matte Black ink is not fully water-resistant, so care should be taken when handling. This cotton canvas is also available for solvent & latex ink printers.
